Introduction

Thank you for purchasing OVRDrive! This Sound Pack includes **200** new Sound Presets for the Elektron Analog Four.

The OVRDrive Sound Pack utilizes the unique features of the Analog Four to achieve familiar and unfamiliar Sounds. We hope that you enjoy playing all of the new Sounds and that they inspire new ideas for your musical projects!

Credits:

Produced by: www.fisound.com

Programming: Chad Beckwith

Beta Testers & Feedback: Wes, & Dataline

Additional Thanks:

To Wes for lending his Analog Four for final Sound organizing and testing!

OVRDrive 1.1 Update Notes:

Update Date: 1/1/2014

The OVRDrive Sound Pack has been updated to utilize the new features introduced in the Analog OS 1.1 update!

The Update includes the following:

- All Sounds Now Utilize Sound Tags. This makes it easier to search, browse, and find the Sounds you are looking for.
- 66 New Bonus Sounds. The OVRDrive Sound Pack now includes 200 Sounds total. The new bonus Sounds take advantage of OS 1.1's new Filter 1 Boost. Enjoy!
- Improved SysEx Delivery. The OVRDrive Sound Pack is now available as a single SysEx file to install on your Analog Four or Analog Keys. The Sound files have also been grouped by category into single SysEx files to make it easier and faster to install. This is easy if you just want to send the new Bonus Sounds, or just send the ATMO or BASS Sounds.

Installation Procedure Updated for OS 1.1

- **Always backup your SysEx Data before receiving new SysEx!**
- On your Analog Four or Analog Keys Global Menu go to "SysEx Dump"
- Then Choose "SysEx Receive"
- Then Choose "+Drive Sound"
- Choose a desired Bank A-P or if you chose the option "Anywhere" Sounds will be placed in the first Sound Slots available.
- You can choose to install the "1.1 OVRDRIVE ALL SOUNDS.syx". This will send all 200 of the Sounds within the OVRDrive Sound Pack.
- Use the GROUPED.syx files if you wish to install SOUNDS based on category. All of the new bonus Sounds are within the "NEW BONUS SOUNDS GROUPED.syx" file.

1.1 Bonus Sound List:

1.1 BONUS SOUNDS:

FI EXTRA 5TH	FI FILTBEAT	
	FI S4W5THS	

Installation & Back Ups (OS 1.06)

Only use these steps if you are installing the Sounds for OS 1.06. Follow the steps from above if you are installing the Sounds for OS 1.1.

Before loading your OVRDrive Sounds onto your Analog Four we recommend that you make backups of your various A4 SysEx data. The C6 SysEx Manager application developed by Elektron is free, and available on their website here: <http://www.elektron.se/support-and-downloads> use the C6 Application to transfer SysEx data between the Analog Four and your computer.

Complete instructions on how to backup and manage your A4 SysEx Data are provided by Elektron in the Analog Four Reference Manual (pages 39-40). Please read the A4 Reference Manual provided by Elektron before attempting to backup or send new SysEx Data.

To perform a Full Backup:

- Launch the C6 SysEx Manager Application and set it to “Receive”
- On your Analog Four go to “GLOBAL | SYSEX DUMP | SYSEX SEND | ALL | FULL BACKUP”
- Hit the “Yes/Save” Button on your Analog Four

To Send your OVRDrive Sounds to your Analog Four:

- Launch the C6 SysEx Manager Application
- Drag and Drop the Sounds you wish to load onto your Analog Four within the C6 File window.
- On your Analog Four go to “GLOBAL | SYSEX DUMP | SYSEX RECEIVE | SOUND”
- Use the Arrow Keys on the Analog Four to select the Sound Slot you’d like to start loading your New OVRDrive Sounds to and hit the “Yes/Save” Button.
- Within the C6 Application select the individual Sound you wish to Send and Hit “Send”.

Abbreviations for Percussion

The Percussion Sounds in the OVRDrive Sound Pack have been abbreviated to make PLOCK Sound Patches Per Step easy and intuitive. The names will fit within the PLOCK Preset LCD window space! One of the most powerful features of the A4 make sure to try it!

Perc Abbreviation list:

BD - Bass Drum

CB - Cowbell

CH - Closed Hihat

CL - Clave

CP - Clap

MA - Maracas

OH - Open Hihat

SD - Snare Drum
